Adds Business Value

Using Cognitive Interpretation, GeoTeriC will transform your decision making processes providing efficiency, accuracy and reduced risk.

Highly Intuitive

Enrich geological understanding and enhance your seismic interpretation using a software that is easy to learn & easy to use.

Our virtual- education program

GeoTeriC's team of highly experienced Geoscientists work together around the world to develop and deliver our monthly webinars. These webinars aim to provide the technical information you need to solve the interpretation challenges you face today.

Following registration you will be sent a link to the hosting session*. To avoid disappointment we advise you check your company's IT permissions for accessing GoToMeeting.

*Please note, it may take up to 24 hours for your confirmation to come through.
